Performance Testing*

Negative Controls

Sample	Specification	Result
Matrix Testing	Negative, ≥6	Pass

Positive Controls

Sample	Specification	Result
Matrix Testing	Positive, ≥6	Pass

*A minimum of four matrices are used for performance testing. All results are interpreted by eye, holding the strip an arm's length away. If the control, hook and test lines are visible the test is considered positive. If only the control and hook lines are visible the test is considered negative. If either the control or hook lines aren't visible the test is considered invalid. Positive controls are spiked at 2ppm.

This letter certifies that the product described above has been tested and found to comply with 3M's product performance specifications applicable to subject device at time of manufacture.
